Internet Banking

✓ Dos

- Change your password periodically; at least once a month.

- Always type the address of the bank website in the address bar of the browser to access your bank account.

- Install reliable anti-virus software on your PC and ensure that it is updated regularly.

✗ Don'ts

- Never share your password with anyone.

- Don't access the bank website from a link provided in an email or from any other source.

- Avoid internet banking on PCs that are often used in public places.
